FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C.

In the Matter of:)
)
Amendment of Section 73.202(b)) RM- _____
Table of Allotments)
FM Broadcast Station)
(Boonville and Fayette, Missouri))

TO: Chief, Allocations Branch, Policy and Rules Division

PETITION FOR RULE MAKING

BIG COUNTRY OF MISSOURI, INC., permittee of FM broadcast Station KTLH, ("Petitioner") by and through its undersigned counsel, FREDERICK A. POLNER, ESQUIRE, and ROTHMAN GORDON FOREMAN & GROUDINE, P.C., hereby respectfully petitions the Federal Communications Commission ("Commission") to issue a notice of proposed rule making to amend Section 73.202(b) of the Commission's rules to reallocate Channel 230A from Boonville, Missouri to Fayette, Missouri and to allow Petitioner to upgrade the facilities of KTLH from a class A to a class C3 facility and to specify Fayette, Missouri as its new community of license. In support of its request, Petitioner offers the following:

1. Channel 230A currently is allotted to Boonville, Missouri. Petitioner proposes the reallocation of Channel 230A from

Boonville, Missouri to Fayette, Missouri and to allow Petitioner to upgrade the facilities of KTLH from a class A to a class C3 and to specify Fayette, Missouri as its new community of license.

2. Petitioner seeks modification of station KTLH's operating authority pursuant to the provisions of Section 1.420(i) of the Commission's Rule which permits the modification of a station's operating authority to specify a new community of license without affording other interested parties an opportunity to file competing expressions of interest.

3. Attached hereto as Exhibit No. 1 and incorporated herein by reference, is the Technical Statement In Support of Petition For Rulemaking, prepared on behalf of Petitioner by Carl E. Smith Consulting Engineers (the "Technical Statement"). As demonstrated in the Technical Statement, if Channel 230C3 were to be allotted to Fayette, Missouri, it would be short spaced to the present operation of KTLH. Therefore, the use of Channel 230 at Fayette, Missouri would be mutually exclusive with its use at Boonville, Missouri. This showing of mutual exclusivity satisfies the requirement of Section 1.420(i) discussed in the preceding paragraph. Channel 230C3 can be allotted to Fayette, Missouri, at the transmitter site described in the Technical Statement in a manner that complies with the Commission's requirements, and creates a preferred allotment plan under the Commission's allotment priorities.

4. The allotment of Channel 230C3 to Fayette would serve the public interest by providing a first local aural transmission service to Fayette, Missouri. Boonville, Missouri would not lose its sole local aural transmission service, as it would continue to receive transmission service from KWRT-AM and KLLR-FM, both licensed to Boonville. Thus, grant of the within Petition would yield an overall allotment plan superior under the Commission's allotment priorities to the presently existing allotment.

5. Both Fayette and Boonville, Missouri are small communities. Fayette, Missouri has a population of 2,888 and is not located within an Urbanized Area. Boonville, Missouri, with a population of 7,095, will continue to be well served by the already existing AM and FM facilities licensed to that community.

6. Petitioner therefore respectfully requests that the Commission issue a Notice of Proposed Rule Making to amend Section 73.202(b) of the Rules as follows:

73.202 TABLE OF ALLOTMENTS

(b) Table of FM Allotments

<u>City</u>	CHANNEL NO.	
	<u>Present</u>	<u>Proposed</u>
Boonville,	230A; 257C2	257C2
Fayette	--	230C3

7. If Channel 230C3 is allotted to Fayette, Missouri as requested herein, Petitioner promptly will upgrade its facility for this new allotment.

WHEREFORE, Petitioner respectfully requests that the Commission's rules be amended in the manner described above.

Respectfully submitted,

BIG COUNTRY OF MISSOURI, INC.

ENGINEERING STATEMENT

This engineering exhibit is prepared on behalf of Big Country of Missouri, Inc., permittee of construction permit BPH-920715MA for new FM station KTLH - Boonville, Missouri. KTLH has filed a license application (BLH-940722KC) and is presently operating under program test authority pursuant to Section 73.1620 of the FCC Rules. This engineering exhibit supports a petition to amend the FM Table of Allotments to upgrade KTLH to a Class C3 facility and change its community of license to Fayette, Missouri. The data contained in this exhibit shows that it is possible to substitute Channel 230C3 in Fayette for Channel 230A in Boonville for use by KTLH.

The geographic coordinates for Fayette are:

NL - 39° 08' 30"

WL - 92° 41' 00"

This places Fayette within Zone II, as defined by Section 73.205(c) of the FCC Rules. Accordingly, as outlined in Section 73.210(a) of the FCC Rules, the allotment of a Class C3 channel to Fayette is permitted. The studies contained in this exhibit were conducted from a site 19.1 kilometers east-southeast of Fayette. The geographic coordinates of this site are:

NL - 39° 05' 00"

WL - 92° 28' 30"

This site also falls within Zone II, permitting the operation of a Class C3 facility from this site.

Table 1.0 is an FM allocation study for Channel 230C3 from the site described above. An examination of this table shows that operation on Channel 230C3 from this site would be short

spaced to the present operation of KTLH on Channel 230A. This short spacing will not pose any problems since this channel will be deleted if Channel 230C3 is allotted to Fayette, as proposed herein. Furthermore, under the provisions of Section 1.420(g) and 1.420(i) of the FCC Rules, this conflict with the existing operation of KTLH will permit the license of KTLH to be modified to specify operation on Channel 230C3 in Fayette, regardless of other expressions of interest which might be received.

Figure 1.0 is a map exhibit showing the predicted 3.16 (city grade) contour from the site specified above for Channel 230C3 in Fayette. This contour was projected assuming maximum Class C3 facilities of 25 kilowatts effective radiated power at 100 meters above terrain utilizing terrain data from the NGDC 30 second terrain database. As shown in this figure, it will be possible to provide city grade service to all of Fayette on Channel 230C3 from a site which will meet all of the spacing requirements to other facilities requiring consideration.

It should be noted that Fayette (population 2888¹) presently has no local radio service and is not located within an Urbanized Area. Thus, the proposal outlined herein would provide Fayette with its first local service, advancing the FCC's allotment priorities. Furthermore, the deletion of Channel 230A would not deprive Boonville (population 7095) of its only local service, as there are two other facilities (KWRT(AM), KCLR-FM) presently licensed to serve Boonville.

¹All population data in this exhibit is extracted from the 1990 U.S. Census.

Figure 1.1 is a map exhibit showing the predicted 1 mV/m contour for Channel 230C3 in Fayette for operation with maximum Class C3 facilities from the coordinates outlined above. This figure also shows the predicted 1 mV/m contour for the present KTLH operating facilities. Table 1.1 presents detailed data on the present and proposed populations and areas, as well as the loss and gain areas. It should be noted that the entire area encompassed by these contours, including the loss and gain areas, is well served, receiving five or more fulltime aural services.

In summary, Channel 230C3 can be allotted to Fayette, Missouri, in place of the present allotment of Channel 230A to Boonville, Missouri, to permit the KTLH operating facilities to be upgraded.
